quality concrete products

INTERLOCKING CONCRETE BLOCKS.

www.cwpconcrete.com

Our interlocking concrete blocks are a simple, reliable solution for a wide range of building and storage needs.

Designed to slot together securely, they're ideal for creating strong dividing walls, storage bays, flood defences and more. With the right engineering, they can be stacked up to 6 metres high, making them as tough as they are versatile.

Block Type	Height (mm)	Width (mm)	Length (mm)	Weight (tonnes)
Full Block	800	800	1600	2.2
Half Block	800	800	800	1.1
Small Full Block	600	600	1200	0.993
Small Half Block	600	600	600	0.496

Multi-purpose

Perfect for building bays, dividing walls, flood defences, security barriers and recycling or aggregate storage.

Strong & stable

The interlocking design adds stability, allowing structures up to 6m tall with suitable design input from an engineer.

Easy to handle

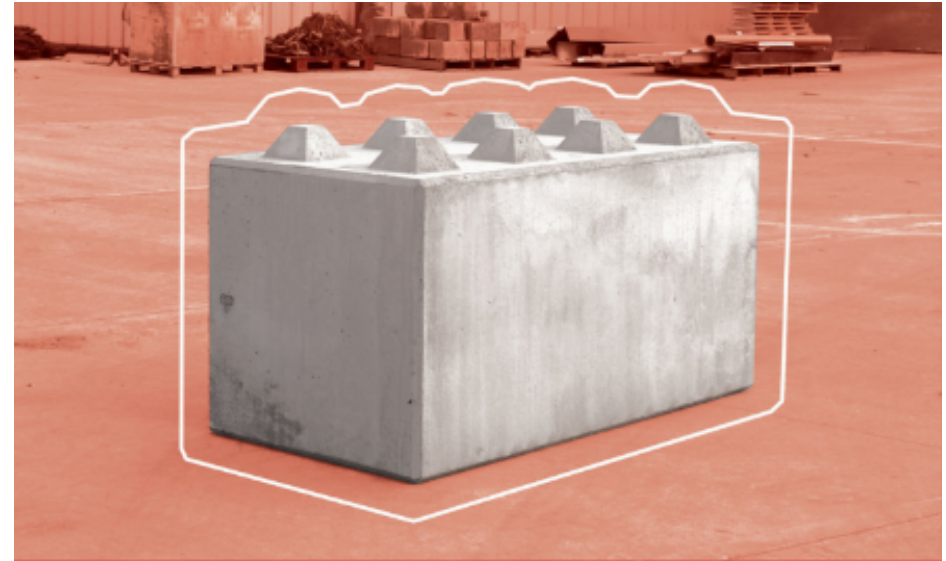

Each block comes with either one or two lifting points, so they're easy to move, rotate and place on site.

Flexible layout

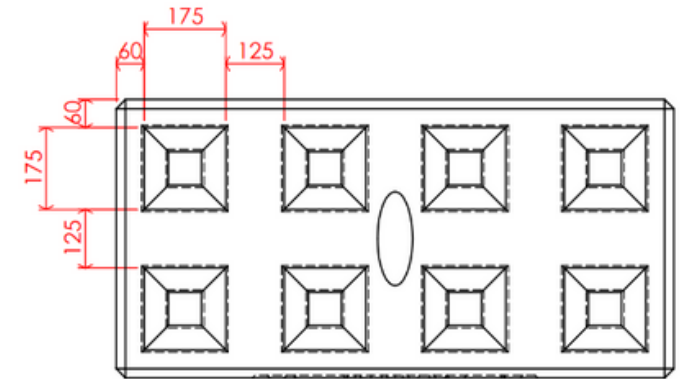

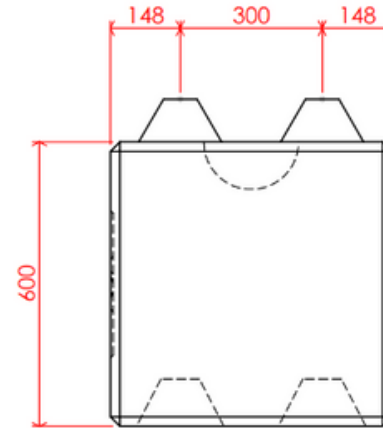

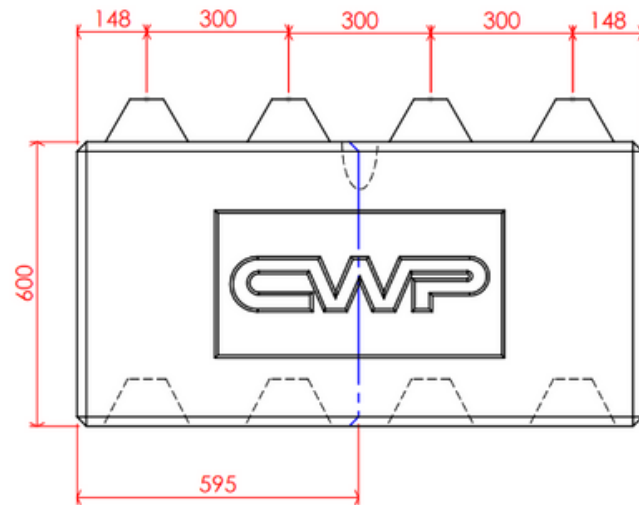

Use half blocks to turn walls 90°, ideal for custom layouts or tight spaces.

Optional extras

Monkey fist lifters available to make installation even easier, just ask our team for details.

1200 x 600 x 600

1600 x 800 x 800
